# SPEC. SHEET

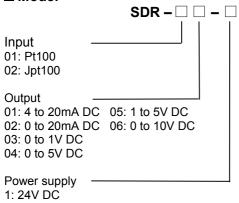

# **RTD Built-in Signal Conditioner**

Model: SDR

## ■ Features

- · Easy wiring pug-in socket
- Compact
- Input-Output-Power; 3-port insulation
- Reduced wiring using the bus plug for power supply

#### ■ Model

## ■ How to order

Specify a model and an input range: (e.g.) SDR-0101-1 0 to 400°C

■ Accessories sold separately

		- 1
Name	Model	Specifications
Terminal block	ATB-001-1	Power line to bus plug terminal connection.  1.5mm² wire connected, screw attached.
End plate	AEP-001-1	Fixed at both ends when DIN Rail Mounted.

## ■ Input specifications

RTD (3-wire system)

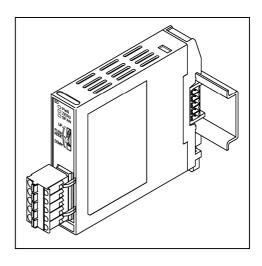

Input detection current : Approx. 0.2mA Allowable lead wire resistance:  $10\Omega$  or less per wire

Burnout : Upscale

Input:

RTD	Input range		
Pt100	-200 to 850°C	-328 to 1562 $^{\circ}\mathrm{F}$	
JPt100	-200 to 500°C	-328 to 932°F	

Minimum span: 200°C

# ■ Output specifications

When the output range lower limit is zero, (even if zero adjustment results in a negative value), the output value will not be negative.

### **DC** current

_	Output range	Allowable	Zero	Span
		load	adjustment	adjustment
		resistance	range	range
	4 to 20mA DC	550 $\Omega$ or less	-2.5 to 2.5%	97.5 to 102.5%
	0 to 20mA DC	550 $\Omega$ or less	0 to 2.5%	97.5 to 102.5%

DC voltage

	=					
-	Output range	Allowable	Zero	Span		
		load	adjustment	adjustment		
		resistance	range	range		
	0 to 1V DC	100k $\Omega$ or more	0 to 2.5%	97.5 to 102.5%		
	0 to 5V DC	400k $\Omega$ or more	0 to 2.5%	97.5 to 102.5%		
	1 to 5V DC	400k $\Omega$ or more	-2.5 to 2.5%	97.5 to 102.5%		
	0 to 10V DC	$600$ k $\Omega$ or more	0 to 2.5%	97.5 to 102.5%		

### ■ Performance

Dielectric strength

Basic accuracy : Within  $\pm 0.2\%$  of each input span or

within ±2°C, Whichever is greater

Response time : 1sec (typical)  $(0 \rightarrow 90\%)$ 

Temperature coefficient: ±0.015%/℃

Input resolution :  $0.1^{\circ}C$ Output resolution : 10000

Insulation resistance :  $10 \text{M}\Omega$  or more, at 500V DC

(Input - Output - Power) : 2.0kV AC for 1 minute (Input - Output - Power)

## ■ Unit specifications

Case Flame-resistant resin Color: Light gray

Front panel Polycarbonate Polycarbonate Base

Spring type plug: Polyamide Color: Green : Polyamide Color: Green Bus plug

Adjustment : Mode selection/setting by front dial

for ZERO/SPAN adjustment

Zero adjustment: ±2.5% Span adjustment: ±2.5%

(1) ZERO indicator lights when the dial is pressed for approx. 3sec, and the unit enters Output ZERO adjustment mode.

(2) SPAN indicator lights when the dial is pressed, and the unit enters Output SPAN adjustment mode.

(3) If the dial is pressed, the unit will revert to Output ZERO adjustment mode (1).

If the dial is pressed for approx. 3sec or no operation occurs for approx. 30sec, the unit leaves adjustment

### Indication:

# PWR Indicator (Green):

Lights when the power to the instrument is turned on. Flashes every 0.5sec if an error has occurred in non-volatile IC memory.

Flashes every 0.25sec during input burnout,

overscale or underscale.

ZERO indicator (Yellow):

Lights while in output zero adjustment.

SPAN indicator (Yellow):

Lights while in output span adjustment.

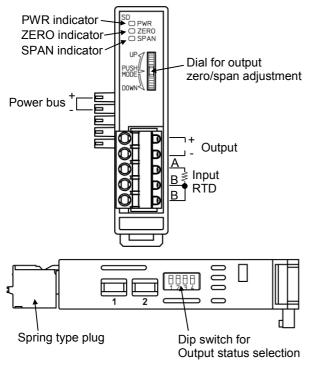

#### Output status selection:

Selects output status Normal/Reverse with DIP switch. NO.1 OFF: Normal, ON: Reverse

Momentary power failure: 30msec

Self diagnosis: The CPU is monitored by watchdog timer, and when abnormal status is found on the

CPU, the unit is restarted by reset.

# **■** Installation specifications

Power supply : 24V DC Allowable voltage range: 20 to 28V DC Power consumption : Approx. 1.5W

-5 to  $55^{\circ}$ C (23 to  $131^{\circ}$ F) 35 to  $85^{\circ}$ RH (non-condensing) Ambient temperature Ambient humidity

Weight : Approx. 82g

Mounting : DIN rail mounting

(Be sure to use End plates for fixing the unit when the unit is mounted on a DIN rail.)

Maximum linkable units: 90 units

: 17.5 (W) x 75 (H) x 85 (D)mm External dimensions
