Ratio Transmitter (1-output)

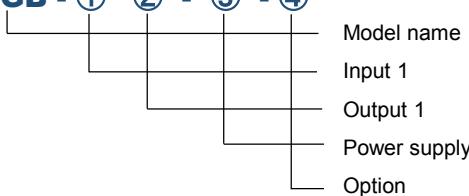

Features:

SGB (1-input 1-output) converts DC voltage/current input into isolated DC voltage/current by setting ratio and bias values using arithmetic expressions. Indication displays are equipped, so numerical values can be set easily. Direct ratio and bias settings are also possible without using arithmetic expressions.

Functions:

- Ratio and bias value setting using arithmetic expressions
- Direct ratio and bias value setting using 2 pairs of input and output values
- Sensor correction (Input value correction)
- Normal/Reverse mode
- Filter time constant
- Manual mode
- Input and Output types can be changed.
- Output high and low limits

Model: SGB - ① - ② - ③ - ④
