Current loop supply with ratio function (1-output)

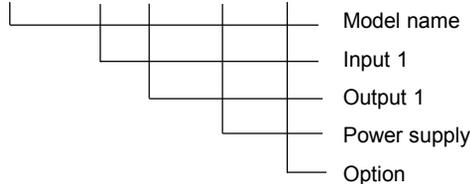

Features:

SGM (1-input 1-output) converts DC current input into isolated DC voltage/current. This unit can be used as power source for a 2-wire transmitter (sensors, etc.). Indication displays are equipped. With the ratio function, this unit can be used in combination with throw-in type level sensors.

Functions:

- Ratio and bias values setting by arithmetic expression
- Direct ratio and bias values setting
- Square root extraction function
- Supports the 'SMART' transmitter.
(Shunt resistor 50Ω + Check resistance 250Ω)
- Sensor correction (Input value correction)
- Normal/Reverse mode
- Filter time constant
- Manual mode
- Output type can be changed.
- Output high and low limits

Model: **SGM** - **A0** ② - ③ - ④
